

MITALI AWASTHI

☎ +91-9896202854 ✉ mitaliawasthi131@gmail.com 💼 [linkedin.com/in/mitali-awasthi](https://www.linkedin.com/in/mitali-awasthi) 🐙 github.com/Mitali-A13

Education

Vellore Institute Of Technology

2022 – 2026

B.Tech. in Computer Science and Engineering

CGPA: 8.43/10

Skills

Programming Languages: C++, JavaScript, Python, SQL

Frontend Development: React.js, HTML, CSS

Backend Development: Node.js, Express.js, FastAPI, REST API Design, JWT Authentication

Databases: MongoDB, MySQL

AI & LLM: Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, AI Agents

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP),

Database Management Systems (DBMS), Operating Systems

Projects

NyAI – AI-Powered Legal Assistant | *Finalist — Bharat Gen AI Hackathon 2025*

🐙 github.com/Mitali-A13/NyAI 🌐 Live Link

- Built an **AI-powered legal research assistant** using **Google Gemini and Retrieval-Augmented Generation (RAG)** to generate context-aware, evidence-backed responses from legal documents and research sources.
- Engineered **dual retrieval pipelines** using Cloudflare Workers and custom document ingestion workflows to improve document relevance, retrieval accuracy, and response quality.
- Designed **structured prompt workflows using Genkit** with multi-source retrieval to enhance factual grounding, consistency, and explainability of AI-generated outputs.
- Integrated **Firebase Authentication and Firestore feedback systems** to manage secure user sessions and capture structured evaluation data for continuous improvement.

ThinkMesh AI | *Multi-Agent Research Automation Platform*

🐙 <https://github.com/Mitali-A13/ThinkMesh-AI> 🌐 Live Link

- Built an **AI-native full-stack research platform** using **React and FastAPI** to generate deep research reports through multi-agent LLM workflows and critique pipelines.
- Engineered specialized AI agents for **web search, content extraction, report writing, and evaluation** using LangChain, Mistral AI, and structured orchestration pipelines.
- Integrated **Tavily search APIs and custom web scraping tools** to gather recent external information for grounded, context-aware, and higher quality responses.
- Developed secure backend services with **JWT authentication, REST APIs, PostgreSQL persistence, and report history management** for end-to-end user workflows.
- Deployed a production-ready full-stack architecture using **Vercel, Render, and PostgreSQL** with environment-based configuration and cross-origin API integration.
- Designed a **React dashboard with reusable components, responsive UI, animated transitions, and research history management**.

Isolyn | *Secure Backend-as-a-Service (BaaS)*

🐙 github.com/Mitali-A13/Isolyn 🌐 Live Link

- Engineered a **secure Backend-as-a-Service platform** enabling developers to manage application data via authenticated REST APIs with **multi-tenant isolation**.
- Implemented **JWT authentication, API key management, and role-based access control** to secure API endpoints and enforce access policies.
- Designed a **dynamic collection-based storage architecture** enabling flexible CRUD operations across multiple applications.
- Developed **per-API-key rate limiting, request validation, and global error handling** to improve backend reliability and prevent API abuse.
- Deployed a production-ready full-stack architecture using **React, Node.js, Render, Vercel, and MongoDB Atlas** with secure environment-based configuration.

Certifications & Achievements

Cloud & Database

- AWS Solutions Architect – Associate (Training Program, 2025)
- MongoDB Associate Database Administrator (Training Program, 2025)

Competitions

- Finalist, Bharat Gen AI Hackathon
